

Computer Ethics

Final Exam

Eng. Mohammed Fawzi AL-Akkad

By: Deema Mohammed AL-Maqadma

١. The Fair and Accurate Credit Transaction Act allows consumers to request and obtain a free credit report each year from each of the three consumer credit reporting agencies.

صح (✓)

٢. Paid media marketing employs tools provided by or tailored for a particular social media platform to build a social community and interact with it by sharing posts and responding to customer comments on the organization's blog and social media accounts.

خطأ (✓)

٣. The country with perhaps the most rigorous Internet censorship in the world is:

- a. China (✓)
- b. United States
- c. Cuba
- d. Brazil

٤. The PATRIOT Sunsets Extension Act granted a four-year extension of provisions of the USA PATRIOT Act that allowed roving wiretaps and searches of business records. It also extended authorization intelligence gathering on "lone wolves."

صح (✓)

٥. Organizations often license the right to make, use, or sell their patented inventions to other organizations. The patent holder organization retains ownership of the invention and earns royalty payments on future sales of the product in which the patented invention is used. The patent holder may grant an exclusive license to one individual company or several companies.

صح (✓)

٦. The two primary objectives of social media marketers are raising brand awareness and driving traffic to a website to increase product sales.

صح (✓)

٧. A copyright is the exclusive right to distribute, display, perform, or reproduce an original work in copies or to prepare derivative works based on the work.

صح (✓)

٨. It is a system employed to collect Internet data including search histories, photos sent and received; the contents of email, file transfers, and voice and video chats; and other Internet communication data.

a. MYSTIC

b. PRISM (✓)

c. Stingray

d. ALPR

٩. The worldwide financial services industry spent over \$27 billion on IT security and fraud prevention in 2015.

صح (✓)

١٠. Copyrights, patents, trademarks, and trade secrets form a complex body of law relating to the ownership of intellectual property, which represents a large and valuable asset to most companies. If these assets are not protected, other companies can copy or steal them, resulting in significant loss of revenue and competitive advantage.

صح (✓)

١١. The National Center for Victims of Crime offers tips on how to combat cyberstalking.

صح (✓)

١٢. Cyberterrorists try on a daily basis to gain unauthorized access to a number of important and sensitive sites, such as the computers.

صح (✓)

١٣. An individual who captures trade secrets and attempts to gain an unfair competitive advantage.

- a. Industrial spy (✓)
- b. Malicious insider
- c. Cracker
- d. Black hat hacker

١٤. Organic media marketing involves paying a third party to broadcast an organization's display ads or sponsored messages to social network users. Two common methods of charging for paid media are cost per thousand impressions and cost per click.

خطأ (✓)

١٥. Employs tools provided by or tailored for a social network platform to build a social community and interact with it.

- a. Unearned media
- b. Earned media
- c. Organic media marketing (✓)
- d. Paid media marketing

١٦. Someone who attacks a computer system or network for financial gain.

- a. Hacktivist
- b. Industrial spy
- c. Cyberterrorist

d. Cybercriminal (✓)

١٧. An advanced persistent threat (APT) is a set of programs that enables its user to gain administrator-level access to a computer without the end user's consent or knowledge.

خطأ (✓)

١٨. The number of Internet users worldwide.

a. is approaching 4 billion

b. exceeds half the population of the world (✓)

c. is under 3 billion

d. is between 2 and 3 billion

١٩. The European–United States Privacy Shield Data Transfer Program Guidelines is a stopgap measure that allows businesses to transfer personal data about European citizens to the United States.

صح (✓)

٢٠. The original General Agreement on Tariffs and Trade (GATT), signed in 1993, created the World Trade Organization (WTO) in Geneva, Switzerland, to enforce compliance with the agreement. GATT includes a section covering copyrights called the Agreement on Trade-Related Aspects of Intellectual Property Rights (TRIPS).

صح (✓)

٢١. Bring your own device (BYOD) is a business policy that permits, and in some cases encourages, employees to use their own mobile devices to access company computing resources and applications, including email, corporate databases, the corporate intranet, and the Internet.

صح (✓)

٢٢. Consumer data privacy has become a major marketing issue—companies that cannot protect or do not respect customer information have lost business and have become defendants in class actions stemming from privacy violations.

صح (✓)

٢٣. The Digital Millennium Copyright Act (DMCA), which was signed into law in 1998, addresses a number of copyright-related issues.

صح (✓)

٢٤. The best Internet filters use a combination of URL, keyword, and dynamic content filtering. With URL filtering, a particular URL or domain name is identified as belonging to an objectionable site, and the user is not allowed access to it.

صح (✓)

٢٥. The use of copyrights to protect computer software raises many complicated issues of interpretation.

صح (✓)

٢٦. Organizations often license the right to make, use, or sell their patented inventions...

صح (✓)

٢٧. The two primary objectives of social media marketers are raising brand awareness and driving traffic to a website to increase product sales.

صح (✓)

٢٨. A copyright is the exclusive right to distribute, display, perform, or reproduce an original work in copies or to prepare derivative works based on the work.

صح (✓)

٢٩. It is a system employed to collect Internet data including search histories, photos sent and received; the contents of email, file transfers, and voice and video chats; and other Internet communication data.

a. MYSTIC

b. PRISM (✓)

c. Stingray

d. ALPR
